Journeying with GEM

The theme of **GEM** (Growing Each Month) in the **Lower Middle School** is "**Journeying with GEM - V'halachta B'drachov.**" The girls are learning the meaning of going in the ways of Hashem and emulating His *middos* by "traveling" to a different country each month. Each student was given a GEM passport and carries a card with the *middah* of the month. Throughout the month, each

teacher shares stories with her class that connect to that positive trait. The story is followed by an assembly that engages the students in an activity that drives home the *middah's* applications. At the end of each month, the girls fill out a reflection card on how they grew over the month. The focus of *Cheshvan* was **Vatranus**, giving in. The walls of the Lower Middle School were filled with the slogan “Give in and Gain.” The students are eagerly looking forward to *Kislev* for the focus on *Gevurah*.

Aleph Beis in the Fifth Grade

Our **Fifth Grade** classes are learning the depth and wisdom of the *Aleph Beis* with a special class by **Rabbi Naftoli Hexter**. These powerful lessons will undoubtedly inspire the student and give them an everlasting appreciation for the richness of the *Aleph Beis*. One of the all-time favorite lessons is from the letters *gimmel* and *daled*: the etymology of these letters reminds the students to be *gomel dalim*, to look for opportunities to assist (*gomel*) those in need (*dalim*).

Eretz Chemda

The **Eretz Chemda** program is underway once again! Our **Fifth** and **Sixth Grade** students have been learning about the unique agricultural *mitzvos* that are only applicable to those living in *Eretz Yisroel*. The girls have heard from dynamic educators from *Eretz Yisroel*, who have been teaching them over Zoom. These lessons will surely deepen our students' connections to *artzeinu hakedosha*!

Seventh Grade
Mechaneches Program
 The **Seventh Grade**
Mechaneches Program was

introduced with the theme of “**Seventh Heaven.**” A panel of Eighth Graders recalled the challenges they faced as Seventh Graders and offered guidance to their younger classmen on how to successfully navigate those challenges. Issues included how to remain organized, take notes effectively, and coping with common social dilemmas.

The girls appreciated the advice and the understanding that their challenges are normal. Outdoor team-building activities rounded out the program and made it an even more memorable experience.

Physics in the Eighth Grade

Our **Eighth Grade Science** classes are busy learning about motion. The teachers took advantage of the beautiful weather by bringing their classes outside, where they measured a predetermined distance. The students then timed themselves, moving in different ways to calculate their speed, velocity and acceleration. The girls had a great time and learned that Science is both meaningful and exciting.

Exhibit 2021 - magnificent, hard cover coffee table book! 100+ pages of full color photos and text! Click here to purchase.
